Subject: 3% Price Increase – CO2 Beverage Cylinders

Dear Valued Customer,

Aluminum prices have risen significantly in the past several months, which directly affect our cost of manufacturing aluminum cylinders. As a result of these factors we are forced to enact a **price increase effective on all shipments beginning January 1st, 2011.**

New pricing schedules reflecting the partial recovery of recent raw material increases will be provided to you shortly.

Please be assured Catalina Cylinders is doing all that is possible to improve efficiencies in order to keep our prices competitive.

We appreciate your business and remain hopeful of your continued support.

Sincerely,

Joseph F. Wolff
Sales Manager
