RE: DOT/TC reciprocity agreement and removal of TC-3ALM stamp

Dear Valued Customer,

Please be advised that a reciprocity agreement between the Department of Transportation (DOT) and Transport Canada (TC) has been reached, which allows all DOT-3AL qualified aluminum high pressure gas cylinders to be sold, put into service, and retested in Canada. Transport Canada has advised that the TC-3ALM crown marking/stamping on aluminum cylinders is no longer necessary.

Starting January 1, 2020, Catalina Cylinders will no longer be stamping the TC-3ALM crown marking on any of our aluminum high pressure gas cylinders, including cylinders sold into (or intended to be used in) the Canadian market.

If you have any questions or concerns, please feel free to contact your Catalina Cylinders representative.

Best Regards,

David Silva
VP Strategy & Operations
Catalina Cylinders, Inc.
